

# HOME THEATER PC CHASSIS

**Model: HTPC 1000B & 1000S  
HTPC 5000B & 5000S**

**Color: B-Black & S-Silver**

## **Quick Installation Guide**

(U.S. & Canada Only)  
Version 1.0

### **TECHNICAL SUPPORT**

If a problem arises with your system and no solution can be obtained from this user guide, please contact your place of purchase or local dealer.

### **REVISION HISTORY**

V 1.0 December, 2009

---

#### **Note:**

This user guide is designed to provide the user a quick reference for chassis setup. We assume you need the information regarding how to assemble the system, such as Motherboard, CPU, RAM Memory, Hard Drive, DVD ROM, Operating System..., etc. Based on this assumption, we make this user guide of quick installation guide. Please follow the description step by step to install the components. If you have any question in assembling the system, please refer your questions to the appropriate Technical Support of the component vendors.

---

## **Overview**

### **Standard Components Equipped**

- HTPC 1000 & 5000 chassis
- 2 x 60mm silent case fan; 1 x 90mm silent HDD fan
- Front connectors (onboard connectors required)
  - USB 2.0 x 3; IEEE 1394 x 1; HD or AC97 MIC & HeadPhone x 1
  - eSATA x 1; SDHC 2.0 compliance all in one card reader x 1
- Tight cables, screws, installation guide

### **Other Suggested Components**

- Vista Home Premium or Ultimate Operation System
- Micro ATX Motherboard
- ATX Power Supply
- CPU / Quiet Cooler
- Hard Drive (SATA is **recommended**)
- RAM Memory
- Optical Drive (DVD Burner is **recommended**)
- Keyboard with trackball (nMEDIAPC 2.4GHz RF wireless keyboard is **recommended**)

### **Suggested upgrades**

- 20X2 nMEDIAPC programmable LCD module
- Sound Card
- Video Graphic Card (Fanless model is **recommended**)
- TV Tuner Card (MCE certified is **recommended**)

## Installation Flowchart (Basic Procedures)

- Open box → Read installation guides → Remove top cover → Remove optical drive bracket → Install motherboard → Install LCD Module if you have bought one → Connect front interface cables → Install CPU & Cooler → Install DIMM memory module → Install hard drives & optical drive → Install power supply → Connect power cables → Lock optical drive bracket → Replace top cover

## Installation Tools

Screw driver / Screws / Tight cables / Installation guides

## Installation Tips:

1. Some optical drives may need to take off the DVD tray cover in order to eject the tray smoothly without blocking by the DVD flip down door.
2. Install the optical drive to the “A” position slot.
3. Use the special made hard drive noise reduction screws to install hard drive.

4. Do not perform cable management until your system is fully configured. This will make the cable management a better smooth procedure.
5. Do not install optional upgrade video card / TV tuner card / sound card at once. Use everything on board (video & sound) to configure system and install operation system. After then, install the upgrades one by one and restart the system on every step to ensure component compatibility and save times of troubleshooting when issue arises.

## Step 1: Remove top cover and remove the optical drive bracket

1. Take off the 2 finger screws and move the top cover backward to take off. Put it aside on a safety place.
2. Take off the two screws that hold the optical/hard drive bracket. Push a little backward then raise it up. Note the arrow pointing is the front “F” facing.

## Step 2: Install Motherboard and connect cables

(Reference only)

1. Follow motherboard user manual to connect cables, CPU, memory etc...
2. Install power supply

## Step 3: Install Hard Drive and Optical Drive

1. Install Optical Drive. Lock the drive to the “A” position
2. Install hard drives. You can install up to 4 hard drives in this model. But, you have to follow the exact sequence to install them. First, take the two slots that are next to the optical drive first, then, use the two slots that are under the bracket. If you don't follow, the bottom drives will block the screw holes for the upper drive slots.

3. Install Optical Drive Bracket back to the case
4. Put the bracket in the slot hole that will hold it in 110 degree angle, connect cables and the power cords for the hard drive and optical drive
5. Lock the bracket
6. Connect power supply cords

## Step 4: Connect Cables

Following your motherboard user guide to:

		<p>Connect Card Reader &amp; USB Ports</p> <ul style="list-style-type: none"> <li>• There are two 10 pins USB connectors. One for the card reader and USB, the other for the other two USB ports</li> <li>• Match the pin label (on connector) and your board user guide USB port layout for accuracy.</li> </ul>
		<p>Connect IEEE 1394 Port</p> <ul style="list-style-type: none"> <li>• There is one 10 pins 1394 connector</li> <li>• Match the pin label (on connector) and your board user guide 1394 port layout for accuracy. (Not all board has onboard 1394 port, leave it unplugged if you don't have it)</li> </ul>
		<p>Connect HD Audio and eSATA Port</p> <ul style="list-style-type: none"> <li>• There is one SATA connector, connect it to your onboard SATA port</li> </ul> <p>Check your board to see if it has HD onboard port that supports HD audio</p> <ul style="list-style-type: none"> <li>• If yes, plug the HD connector to your HD onboard audio port</li> <li>• If no, plug it to your AC 97 chipset onboard audio port using the Y tale connector</li> </ul>
	<ul style="list-style-type: none"> <li>• Connect Power Switch connector to your onboard port</li> <li>• Connect Reset Switch connector to your onboard port</li> <li>• Connect HDD Power Switch connector to your onboard port</li> </ul>	
	<p><b>LCD Module</b></p> <p>If you purchase the LCD programmable module. Simply take off the black label that blocks the LCD window, install it behind the panel. No need to take off the panel, just take out the Optical bracket, you can install the module directly inside the case.</p>	
	<p>Organize the cables with provided cable ties.</p> <p>See picture for reference.</p>	

## **Step 5: Other Component Installation**

For other components, including hard drive connection; RAM; CPU & cooler; optical drive, operating system, video card, sound card, TV tuner card and power supply connection etc., follow the user manuals and motherboard manual instruction.

### **Safety Instructions**

- Always read the step by step installation instruction to protect your components
- Keep the user guide for future reference
- Keep away from humidity, liquid and temperature above 60c (140 f) environment
- Make sure the voltage of the power supply and adjust properly 110/230V
- Always unplug the power cord before inserting any add-on devices

Get the system checked by service personnel if below happens:

- The power cable is damage
- Liquid has penetrated into the system
- Dropped and damaged

### **RMA Return Policy**

- All accessories and cables must be returned as they were shipped
- Carefully re-packaging is needed to avoid shipping damages
- All warranties are subject to properly uses. Any human power damages return may be rejected according to warranty terms and conditions
